Customer Partnership Opportunity

THE PROBLEM

Your Losing Time & Money On Every Order

20–40% order error rate

Avg 30% of work hours lost weekly

Millions in delayed sales

Every quote or order requires you & your employees to make contact, multiple times, via various methods.

How your business is forced to work with your distributors today:

- Wrestling with inconsistent, hard-to-navigate distributor portals
- Driving to physical locations only to wait in line
- Drowning in endless email chains with overloaded sales team
- Emailing generic distributor inboxes with no visibility or tracking
- Chasing sales reps by phone with no guarantee of a callback
- Then manually copy & pasting that data into their invoice & estimate apps.

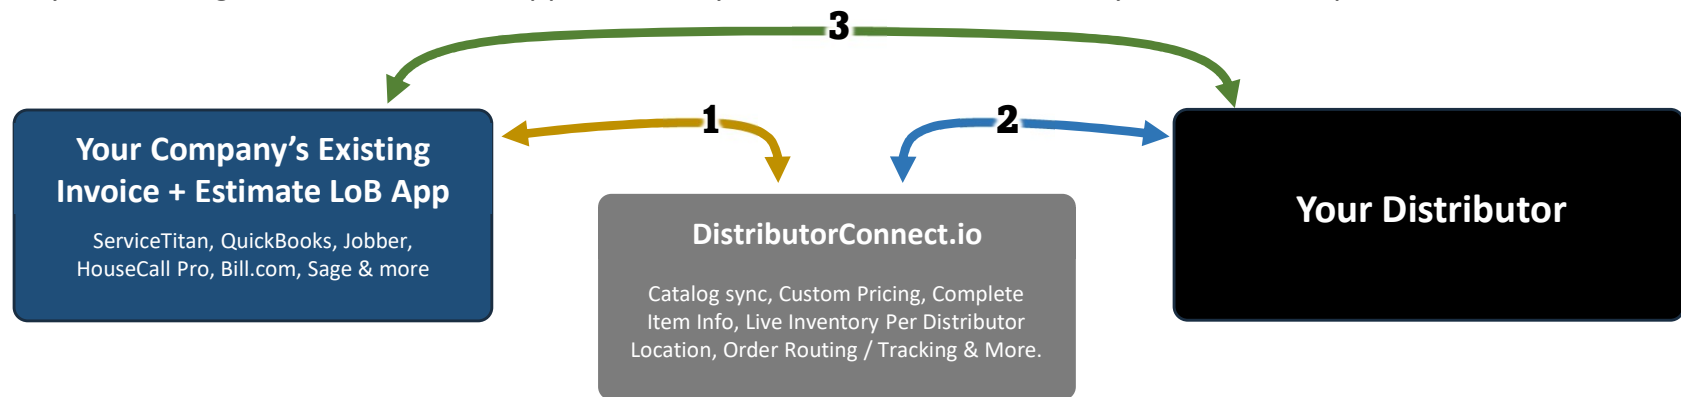

Every Quote, PO, Order & Update Requires Various Combos Of These Resource Draining Processes, And The Worst Part Is That

None Of That Time Is Billable.

THE SOLUTION

Drastically Reduce Your Quoting & Ordering Workflows

Use your existing invoice & estimate app to search your distributor and instantly add items to quotes, POs and orders.
